PABLO GRASA

DESIGN ENGINEER & UX/UI DESIGNER

(+34) 666 02 79 82 pablo.grasa@gmail.com www.linkedin.com/in/pablo-grasa-mateo

PROFESSIONAL PROFILE

Industrial design engineer with extensive experience in technical office work focused on industrial production, working closely with manufacturing and workshop teams. Specialised in interface prototyping for apps and websites, complemented by a working knowledge of web development. Passionate about user experience and skilled at using artificial intelligence tools to enhance and speed up the design process. Strong creative skills and a solid technology focus.

WORK EXPERIENCE

Draughtsman Engineer

HMY / You3D - March 2026 - Present

- **3D modelling** of furniture to client specifications using **SolidEdge**
- Production of **technical drawings and part coding** for in-house workshop manufacturing
- Order and quote management with **suppliers**, and **client** liaison

Graphic Designer at a Design Studio

Novo Studio - October 2025 - January 2026

- Use of **Adobe Suite** (mockups, composition, layout)
- **Product** presentation design
- **Website** and promotional material design

Technical Office Draughtsman Engineer

Vall Estructures - September 2024 – April 2025

- Management of bills of materials and supplier orders
- Design of **assembly drawings** for temporary steel structures, issued directly to site
- Advanced **AutoCAD** user

Technical Office Draughtsman

Equimodal - June 2023 – February 2024

- Management and design of highly detailed assembly drawings for site
- Development of a SolidWorks plug-in with a form-driven auto-modelling system for the corrugated sheet of shipping containers
- Bachelor’s thesis put into practice at the company: “Design of a Bench and Tooling for an Automatic Welding Robot”

Brand Identity Design

Rumex: Veterinary Group - June 2022

- **Logo design** and brand identity for RUMEX
- **Print** preparation for merchandise and the company vehicle wrap

EDUCATION AND ADDITIONAL TRAINING

- Master’s in UX/UI Design and Graphic Design - CEI: Centro de Estudios e Innovación (2025)
  - Specialisation in digital interface design, information architecture, interactive prototyping and user testing.
- Bachelor’s Degree in Industrial Design Engineering and Product Development - University of Zaragoza (2019 - 2024)

LANGUAGES

- English: Advanced C1 (official Cambridge certificate, 2025).
- Spanish: Native.
- Catalan: Reading comprehension; basic speaking, highly motivated and actively learning.

TECHNICAL SKILLS AND SOFTWARE

- Design, Modelling and 3D Environments:
  - Advanced level: SolidWorks, SolidEdge, Fusion 360, Autodesk Inventor, Catia V5, Siemens NX, AutoCAD.
  - 3D and Animation: **Cinema 4D** (polygonal modelling of scenes, props and characters), preparation of geometry and files for digital fabrication (STL/3MF) and basic knowledge of game engines (Unity).
- Video Editing, 2D Design and Interaction:
  - Video and Post-production: **DaVinci Resolve** (editing, assembly and colour grading).
  - Vector and Graphic Design: **Adobe Suite** (Illustrator, Photoshop, InDesign), Canva.
  - Prototyping and Interface (UX/UI): **Figma** (interactive experience design, wireframing, design systems and usability testing).
- Hardware, Prototyping and Programming:
  - Operation, calibration and maintenance of digital fabrication equipment (**3D printing / slicing**), audiovisual recording equipment (DSLR/mirrorless cameras, lighting and sound) and Virtual Reality devices (setup and use).
  - Code and Automation: basic HTML5, CSS3 and Java, and parameter automation in 3D environments.

INTERPERSONAL SKILLS

- Communication and presentation with clients and multidisciplinary teams.
- Adaptability and flexibility in live, changing projects.
- Critical thinking, problem-solving and decision-making.
- Teamwork and constant coordination across departments and regions.
- Self-directed learning and self-management.

FEATURED PROJECTS (UX / INTERACTION / AUDIOVISUAL)

(See details in portfolio)

- Interactive “Companion” App for a Strategy Video Game (RiftOS): user research, interaction architecture and functional prototyping for the gaming sector using the Design Thinking methodology.
- Digital Platform for Workspaces (BaseHub): user experience design and testing using an agile methodology (Design Sprint).
- Independent Audiovisual Production and Editing: technical direction, shooting with my own equipment, multi-camera editing and colour correction in DaVinci Resolve for a short film.
- Mechanical Prototyping and 3D Printing: parametric design, tolerance validation, mesh preparation (STL/3MF) and additive manufacturing of functional mechanical devices.

INTERACTIVE PORTFOLIO
